

G DATA TOTAL PROTECTION

THE COMPLETE, WORRY-FREE PACKAGE FOR MAXIMUM PROTECTION ON THE INTERNET AND FOR SAFEGUARDING PERSONAL DATA

G DATA has been researching the fast-moving field of data security for 30 years. The result is award-winning, intelligent security software for PCs and mobile devices that stays in step with the times. The EU community project IPACSO recognized us as the most innovative IT security company in 2014 for our quick reaction to new threats. And our users are convinced by the quality of our solutions developed in Germany

– almost 90 percent would purchase G DATA products again.*

G DATA security solutions are impressive for their easy installation and clear operation – and for providing reliable protection against digital malware. All of which guarantees worry-free online banking and shopping, and the best protection for emails and personal data. All licenses can be upgraded or extended flexibly

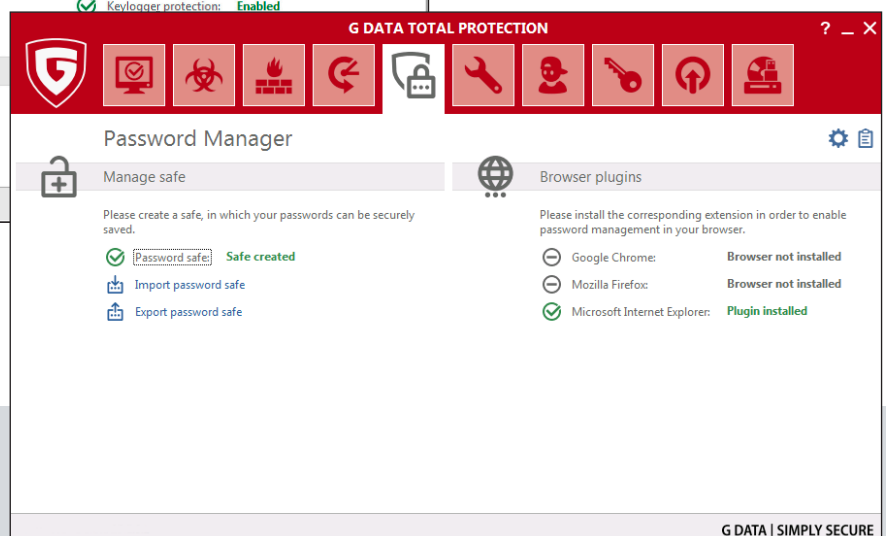

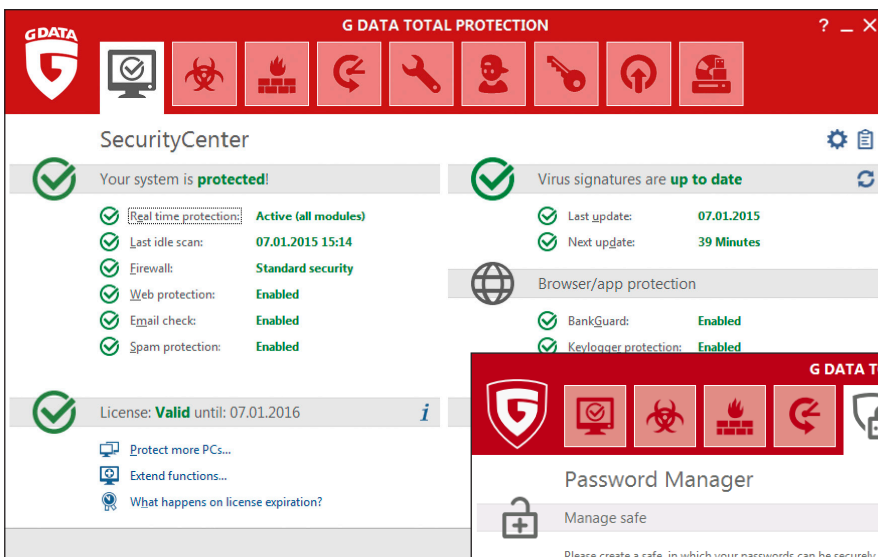

and easily at any time – so every user gets the perfect security package for their needs.

NEW! PASSWORDMANAGER

To make your online life easier and safer, the new generation of Internet Security has an easy to use password manager. It will appear after installation as an icon in your browser (Internet Explorer, Chrome, Firefox) and remembers all the passwords of web-sites that require encrypted accounts.

And if you have any questions, our trained, experienced, international service team is at your disposal around the clock, 365 days a year.

SIMPLY
SECURE

COMPREHENSIVE SECURITY FOR DISCRIMINATING USERS

Best protection against viruses and other online risks	Put your trust in the best virus detection** that uses technologies working in parallel
Behavior monitoring of files and programs	Benefit from proactive detection and Cloud connection that protect you against even unknown malware – now with autopilot for trouble-free surfing and work
Instant protection for your email	Scan even SSL-encrypted emails for malicious attachments and other suspicious content as soon as they are received
Protection against software security vulnerabilities	Secure your computer reliably against security holes in installed programs, with Exploit Protection
Secure online banking and shopping	Use BankGuard technology and configurable Keylogger Protection to protect yourself against manipulation and data theft on the Internet
Protection against hacking via a secure firewall	Monitor all incoming and outgoing connections and reliably protect your PC against hackers and attacks
AntiSpam to block advertisement and phishing emails	Use email and spam protection to block annoying spam email and put your trust in filtered email with no dangerous phishing links
Protection for your children with age-appropriate surfing	Keep your children away from inappropriate websites and prevent excessive surfing and gaming by time limiting computer and Internet use
Browser Cleaner to block annoying add-on programs	Remove unwanted toolbars and add-ons from Internet Explorer, Firefox and Chrome
Secure backups in the Cloud	Set up password-protected back-ups and back up your files to the Cloud automatically (e.g. in your Dropbox or using Google Drive)
Access control for USB sticks, hard disks etc.	Specify who is allowed to use USB sticks, burners and other devices on your PC
Protection against manipulated USB devices	Use the USB Keyboard Guard to protect yourself against USB devices that pretend to be keyboards
Protect your data via strong encryption	Password protect confidential information and files against unauthorized access
Increased performance with the integrated tuner	Delete outdated cache entries and other clutter and gain significantly more performance
Customized update management	Specify which network connections can be used for updates – and prevent unnecessary costs from UMTS and LTE connections
NEW! PASSWORDMANAGER	No more cheat sheets and weak passwords. With the new Password Manager you now have access at any time to the Internet passwords you use
Backup	Easily create password-protected backups or back up your data automatically in the cloud

Includes one 12-month license with hourly virus signature updates, software updates, and version upgrades.

System requirements

Windows 10 / 8.x / 7:
min. 2 GB RAM (32 bit + 64 bit)

* Representative survey of 514 customers between November 2012 and January 2013.

** "Best virus detection" in every Stiftung Warentest comparison test from 2005-2015. Tested version: G DATA Internet Security
